Nimo Test Exercise

Task:

1. Use Reactjs to present the market data of cryptocurrencies into a table
1. Use Material UI components to style the application and the table components
1. Visit https://www.coingecko.com/ for reference (only for reference, not required to replicate all the features that are being provided in the link)
1. The approach for design and presentation of the application is open to the candidate
1. Create public GitHub repository and send back the link for assessment
